## **She Cosmetic Surgery Offers Complete Liposuction Care**

Minneapolis, MN, November 15<sup>th</sup>, 2009 – Liposuction is getting popular with the advancement of liposuction technologies. Shu Cosmetic Surgery is the ideal cosmetic center for individuals looking for the perfect liposuction treatment and care.

Shu Cosmetic Surgery offers state-of-the-art technologies in laser liposuction and Vaser liposuction that provide patients with quick and effective ways to instantly melt away body fat.

Laser liposuction is a fast, safe, and minimally invasive procedure that uses a laser to melt and remove unwanted areas of fat to reshape your body. It works very well in all areas in the body, but even better in the smaller areas, such as neck, upper arm, and thigh. A bonus to the laser liposuction is the skin tightening effect that follows. Laser liposuction stimulates the production of collagen, resulting in smoother and tighter skin in the targeted areas.

Vaser liposuction has been the choice for thousands of men and women. It's an ultrasound liposuction procedure that offers a highly successful way to remove unwanted fat on just about any part of your body.

"Vaser liposuction is more efficient liposuction technology than laser lipolysis, this procedure works extremely well in the large areas, such as abdomen, the recent study showed it causes 53% skin tightening after liposuction" Dr. Shu said.
